DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 1, drawn to a mixture of a hydrogen storage alloy and a hydrogen absorbing material.

Group II, claims 2-6, drawn to a hydrogen storage alloy unit.

Group III, claims 7-10, drawn to a heat pump.

Group IV, claims 11-12, drawn to a hydrogen compression apparatus.

2. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims listed in the above mentioned group are uniquely different because of the following reasons:

Group I: Claim is directed to a mixture of a hydrogen storage alloy and a hydrogen absorbing material.

Group II: Claims are directed to a heat exchange chamber, which a heating medium source circulates; a pair of hydrogen chambers; hydrogen storage alloy pipe groups;

wherein the hydrogen storage alloy pipe groups comprise hydrogen storage alloy pipes provided a hydrogen storage alloy inside.

Group III: Claims are directed to a heat pump comprising: a first hydrogen storage alloy apparatus provided with a first hydrogen storage alloy; a second hydrogen storage alloy apparatus provided with a second hydrogen storage alloy; third hydrogen storage alloy apparatus provided with a third hydrogen storage alloy; and a fourth hydrogen storage alloy apparatus provided with a fourth hydrogen storage alloy.

Group IV: Claims are directed to a hydrogen compression apparatus comprising: a hydrogen storage alloy apparatus having a hydrogen storage alloy; a first pressure container and a second pressure container; a pump; and a hydrogen storage container connected to both the first pressure container and the second pressure container.

3. A telephone call was made to C. Irvin McClelland on December 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3753

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
